## EXPERIENCE

### Artificial Intelligence Intern

#### Dataprev

📅 Mar 2021 – Ongoing

📍 Brazil

- Development of a chatbot Framework with Rasa, allowing clients to configure and talk to it 24/7, which resulted in less human operator interactions.
- Development of models for classification, detection of civil documents and character extraction using OCR, decreasing the client's manual activity in analyzing and extracting information from documents.

### Discipline Monitor

#### UFPB

📅 Sep 2020 – Dec 2020

📍 Brazil

- Scholarship in the monitoring of the Data Structure subject, offered to courses at the UFPB's Informatics Center. Assistance to the professor and students of the subject, development of extra material, classes review, doubt shifts.

### Volunteer

#### PyLadies Paraíba

📅 Jul 2019 – Ongoing

📍 Brazil

- In order to support other women, we organize events, give Python classes and create a support network with women from all over the state.

### Volunteer

#### IEEE

📅 March 2018 – Ongoing

📍 Brazil

- We organize events, study groups and other activities within the local IEEE chapter. I participated as a member of the Women in Engineering (WIE) board in 2018 and continued with volunteer activities in the CS/CIS and WIE chapters.

## EDUCATION

### Bachelor in Data Science and Artificial Intelligence

#### UFPB

📅 Jul 2020 – Jun 2023

📍 Brazil

The first Data Science bachelor course in a federal university, with subjects like Machine Learning, Statistical Inference and Programming, providing a theoretical and practical experience.

### Bachelor in Computer Engineering (Interrupted)

#### UFPB

📅 Jul 2017 – Jun 2020

📍 Brazil

First experiences with C and C++ programming languages.

## AWARDS

### 2nd place in RASckathon 2020

A humanitarian hackathon with the theme of Robotics and Automation in Health. We developed a solution linking a smartphone to a game for human rehabilitation. While the person practices the rehabilitation exercises, the smartphone captures the activity and uses gamification to motivate and compete with others.

### 1st place in Hackathon Softcom 2019

Hackathon bringing solutions aimed at the Softcom company, with customers from many different niches and realities. We brought an automated and accessible data analysis to the end customer inside the company's application.
